

LONDON CITY DENTISTS

We would like to take this opportunity to introduce ourselves to the members of Friends of St Katharine Docks (FOSKD)

'London City Dentists', provide all forms of dental treatment, from routine examinations and oral cancer screening to advanced restorative dentistry including implants and cosmetic work.

We are situated within 'Rood Lane Medical Centre', on the First Floor, 10 Lloyds Avenue, EC3N 3AX (located near the rear entrance of Fenchurch Street Station and opposite, 'Pod'.)

In view of this, we would like to welcome **new patients** with the following offer:

A **FREE** hygiene appointment (usual fee £70 - £105) for each new patient that books an examination at our practice.

Consultation and examination includes:

- Oral cancer screening
- Detection of caries, failing restorations and fractured teeth
- Periodontal health check
- Full mouth charting Fee £70.00 only
- Any radiographs £10 each

Our opening hours are 7.45am to 5.45pm (we also offer lunchtime appointments)

To book your examination and hygiene appointment, or if you have any questions relating to the other treatment services we provide, please contact the practice on **020 7488 4445** and speak to a member of our team. Please, quote "Friends of St Katharine Docks" when booking so we can apply your free treatment.

Also, please take the opportunity of visiting our website:

Benefits include:

We are a convenient short walk from St Katharine Docks

We provide:

- Up to the minute technology in a very relaxed and pleasant atmosphere.
- The latest DVD glasses can be provided during treatment.
- Early morning and lunchtime appointments to suit your needs.

The principal dentist, Dr. Wayne Holness, qualified from Leeds Dental Institute in 1996, and has worked in a variety of locations including hospital and 'specialist' private practice before setting up his own private practice in 'The City'. He has a special interest in Oral and Maxillofacial Surgery. As a practice we are also experienced in working with anxious and phobic patients.

Our philosophy revolves around prevention and maintenance, whilst being minimally invasive when having to restore working teeth on the basis of pain, or poor function or aesthetics.
